

Children & Youth Virtual Services

Center for the Visually Impaired offers remote services for kids of all ages with vision loss and their families.

We can help your child succeed academically, thrive socially, and gain independence.

Here's how we can help:

One-to-One Virtual Coaching in important skills, including Orientation and Mobility, Activities of Daily Living, Assistive Technology, and Braille.

Adjustment to Vision Loss Remote Counseling for high school aged students, provided by licensed and caring counselors.

Monthly Parent Support Group via Zoom for parents and guardians of children with visual impairment.

No matter where you live, we can help you find the best solutions for your family.
